

CIRC: Planning–C: Building a Safer Cyberspace by Creating a Centralized Research Infrastructure to Track and Mitigate Privacy Harms

PI: Xinru Page, Co-PI's: Cori Faklaris, Bart Knijnenburg, Pam Wisniewski

Design and implement a privacy incident repository which captures primary and secondary harms (e.g., reputational, psychological).

How likely would users be to contribute to this system?

By Privacy Incident Type

By Demographic Type

We could not detect strong patterns from other demographics such as gender identity, sexual orientation, religion, and income level. Future work will test these differences on a broader sample.
